

5 Ways To Drive Revenue And Manage Your Customers' Distributed IT

Save Time And Money With EcoStruxure IT

EcoStruxure IT advanced monitoring software and support helps anticipate, optimize, and perform¹. Leveraging EcoStruxure IT and remote management enables your customers to:

- ✓ Save 2.7x in costs and capabilities
- ✓ Maintain global visibility across the hybrid ecosystem from a smartphone
- ✓ Avoid potential risks by leveraging global benchmarks and analytics

1

Modernize And "Right-Size"

Partner with Schneider Electric to easily assess your customers' environments and help modernize them for efficiency. This helps reduce energy consumption by deploying new product innovations and right-sizing infrastructure.²

2

Optimize Datacenter And Edge Designs

Schneider Electric offers more than 25 digital tools³ to assist in creating resource-efficient designs, including calculators for:

- ✓ Single-phase UPS efficiency
- ✓ Edge UPS fleet management
- ✓ UPS infrastructure total cost of ownership

3

Easily Find Transparent Environmental Product Data

Enhanced transparency on product environmental attributes for all products covering the full product life cycle through Schneider Electric's Environmental Data Program. This detailed environmental information exceeds existing regulatory requirements, addressing customer requests.⁴

4

Recycle To Lower Carbon Footprints

UPS Lifecycle Services make it easy for your customers to meet their sustainability requirements. Schneider Electric handles everything from equipment collection to recycling sorting, recovery and recycling and can provide a sustainability report.
